Oct, 2026. Alier Sánchez y Sánchez, Letter of Recommendation

Dear Admissions Committee,

It is my pleasure today to write this recommendation for Alier Sánchez y Sánchez in support of his application to the University of Pennsylvania. I taught him in my Mathematics class during his final year at Liceo Cancún.

Alier is, without exaggeration, one of the most analytically gifted students I have ever taught, always connecting dots between class and his environment.

In the classroom, Alier frequently brought his experiences from his extracurricular adventures, such as the International Olympiad in Informatics and the national mathematics olympiads he has attended, into our discussion, adding diversity to the environment for everyone in the classroom and making our sessions more enjoyable.

I must also point out that his initiatives outside the classroom to make education more accessible personally intrigue me, and I consider this to be his most remarkable quality. This makes this letter easy for me to write. He approaches academics like an Engineer who never loses sight of the Humanities. He will be in the best hands at the University of Pennsylvania, and I recommend him without reservation.

Cordially yours,

Gisela Hernández, Liceo Cancún
